PPUs Offered through MSPGH

[Professional Placement Units](#) (PPUs) are available to MPH students in their final year of the MPH if they have maintained a certain grade point average. Further information detailing eligibility, course requirements and previous placement projects can be found on the [MPH Student Community on LMS](#).

Melbourne School of Population and Global Health has spent a substantive amount of time establishing and maintaining productive working relationships with the public health organisations that provide PPUs. To preserve these relationships, and the benefit that they provide to current and future students, students interested in discussing PPU placements are asked to contact [Sue Durham](#), rather than directly contacting the involved organisations.
